### Entire Tech Rolls Out EV Charging Stations at Hulme Court, Myaree

Entire Tech, a locally-owned and operated technology enterprise based in Myaree, announces a major step towards promoting sustainability and environmental consciousness by introducing three Electric Vehicle (EV) charging stations located at 17 Hulme Court, Myaree.

The West Australian-based company, which recently celebrated its 20<sup>th</sup> year in business, was awarded the Charge Up Workplace Grant by the Department of Mines, Industry Regulation and Safety to install the charging infrastructure located off McCoy Street.

The technology services company, which delivers fit-for-purpose solutions to small-medium businesses across both Apple and PC platforms, said that Hulme Court sees hundreds of vehicles pass through daily to work, dine, shop and engage with this bustling precinct of the City of Melville. They expect the chargers to be used all the time as there are noticeably more EVs on the road.

“As part of our on-going efforts to align with global sustainability goals and address climate change, Entire Tech has invested in the installation of three state-of-the-art EV charging stations at our office facility located at 17 Hulme Court. These charging stations are designed to provide convenient and efficient charging solutions for both employees and visitors who drive electric vehicles.” said David Locke, Entire Tech’s Managing Director.

They expect the charging stations to attract attention to the area as a progressive business hub, attracting patrons who may not have visited Hulme Court before or who are looking to utilise the charging stations in the area.

“This initiative underscores our commitment to reducing our carbon footprint and supporting the transition to cleaner transportation options.” David added. “We believe that businesses have a pivotal role to play in addressing climate change, fostering a sustainable future and creating a sustainable and eco-friendly workplace. We are excited about the positive impact these charging stations will have on our community and the environment.”

Entire Tech has engaged EV Charging Systems, a WA- based supplier of electric vehicle chargers and infrastructure, to install and service the charging systems. Headquartered in O’Connor, EV Charging Systems is a leading vendor of these systems including AC and DC solutions, a licenced electrical and communication contractor, and a member of the Australian Electric Vehicle Association (AVEA), Smart Energy Council Australia and a WA Local Government Association (WALGA) preferred supplier.

“EV Charging Systems is excited to be working with Entire Tech to deliver an end-to-end charging system to this south of the river location to help enhance their environmental, social and governance (ESG) practices, as well as provide a publicly available charging solution to the wider Melville and Fremantle community,” said Alex Foster, Director of EV Charging Systems.

The chargers will be used daily during business hours by the Entire Tech business fleet and can also be used by Entire Tech’s business and retail customers, as well as the public who require EV charging outside of business hours.

The charging stations located in the open-air carpark of 17 Hulme Court, Myaree, are expected to go live in mid-October.
